Why Attend

The landscape of data protection is rapidly evolving in Saudi Arabia (KSA), and professionals such as Compliance Officers, Data Protection Officers, and Auditors, must equip themselves with the knowledge and skills required to ensure adherence to the new Saudi Arabia Personal Data Protection Law (PDPL).

This practical course is designed to empower participants with the essential knowledge and tools needed to successfully implement a robust data protection program within their organizations in KSA. This course is particularly well-suited for Compliance Managers and individuals seeking to expand their knowledge in the realm of processing personal data and its practical implementation within their organizational framework.

By the end of this course, participants will be well-prepared to navigate the complexities of PDPL compliance in KSA and spearhead data protection initiatives within their organization.

Course Methodology

This course is based on open discussions, question and answer sessions, group exercises, activities, videos, case studies and presentations based on best practices, case studies and core principles.

Course Objectives

By the end of the course, participants will be able to:

- Review and reinforce understanding of Personal Data Protection Law (PDPL) principles and the rights of data subjects
- Proficiently identify the lawful basis for data processing
- Gain comprehensive knowledge of the responsibilities and duties of a Data Protection Officer (DPO)
- Apply acquired knowledge to establish an effective privacy program, encompassing both centralized and hybrid models
- Develop strategies for implementing the necessary technical and organizational measures to safeguard personal data within your organization

Target Audience

The course is suitable for anyone who will be managing the implementation of the Saudi Arabia Personal Data Protection Law (PDPL). This includes but not limited to; compliance officers or managers, data protection officers, auditors, IT managers, project managers, lawyers and business analysts. While there are no specific prerequisites for enrolment, having a foundational understanding of data protection concepts can be advantageous.

Target Competencies

- Investigating
- Compliance
- Leadership
- Decision making
- Communication with stakeholders
