

Leading with Agility and Resilience

Why Attend

More than ever before the only constant in this world is unexpected change. Organizations are facing challenges from all sides and only agile, flexible and resilient leaders will be able to navigate the rough seas where others sink or crash. In this course we provide you with the leadership skills needed to thrive where others collapse, and the tools to surmount the hazards facing 21st century organizations.

Course Methodology

The course uses a mix of interactive techniques, such as brief presentations by the consultant and the participants, role plays (rehearsed and impromptu), playback of videotaped performances and individual and group feedback.

Course Objectives

By the end of the course, participants will be able to:

- Explain the importance of leading agile organizations
- Predict and adapt to change with agility and resilience
- Lead and develop rapid response mechanisms to environmental changes
- Create compelling agile communication strategies to lead and drive change
- Identify strategies to build and enhance agility and resilience in themselves and others
- Describe how the brain develops resilience
- Assess their own leadership capability for resilient performance
