

Advanced Maintenance Management

Why Attend

To survive in today's world of 'lean and mean' operations, we cannot wait for breakdowns. As a matter of fact, we should make responding to breakdowns the exception in our daily workload, not the norm. A successful and effective maintenance operation has to break away from the 'fix it when it breaks' mentality. The ultimate goal of the maintenance department should be to 'stop' things from breaking, increase assets availability and reliability and do so with the lowest possible cost.

This has certainly put an immense pressure on the maintenance department management team. In this course, various best practices will be presented that deliver the above objectives.

Course Methodology

The course uses a mix of interactive and hands-on techniques. Beside the brief presentations by the consultant and the participants, there will be many individual and group exercises. The course also includes a maintenance department audit checklist which the participants will individually complete during the course to evaluate the effectiveness of their respective departments.

Course Objectives

By the end of the course, participants will be able to:

- Demonstrate the latest concepts and techniques required for managing or supervising a maintenance unit
- Examine the organizational and managerial considerations for effective maintenance work
- Apply techniques to measure Overall Equipment Effectiveness (OEE)
- Distinguish and optimize the special characteristics of maintenance activities
- Debunk safety myths safety and identify unsafe acts and conditions
- Identify common maintenance Key Performance Indicators (KPIs) and develop the maintenance department scorecard

Target Audience

Those involved in the supervision or management of maintenance activities; also anyone interested in learning more about the critical role of maintenance in a company.

Target Competencies

- Maintenance theory and practice
- Maintenance work processes
- Influence and communication skills
- Financial evaluation
- Safety theories and principles
- Performance management

Associations

SMRP (Society of Maintenance and Reliability Professionals) : The Society for Maintenance & Reliability Professionals (SMRP) is a nonprofit professional society formed by practitioners to advance the reliability and physical asset management industry and to create leaders in the field. SMRP provides unparalleled value for individual practitioners looking to expand their knowledge and skills in maintenance and reliability and build more business connections with other practitioners. SMRP is the premier asset management resource for companies looking to improve their processes and procedures. As an SMRP Approved Provider, Meirc PLUS Specialty Training is recognized for best-in-class continuing education training courses in reliability and physical asset management.

Location & Date

19 Nov - 23 Nov, 2017
Dubai, English
Rotana Arjaan Media City

Meirc reserves the right to alter dates, content, venue and trainer.

Fees: US\$

Per participant

US\$ 4,600

(including coffee breaks and a buffet lunch daily)
